BUILDING AN INCLUSIVE

A COMMON GOAL.

SUSTAINABILITY

Sofidel has identified the WWF as a first-level, reliable partner thanks to its history, international profile and widely acknowledged prestige. Contact with the environmental organisation was first made in 2007. The Group has been working alongside WWF for over 15 years. In these years of partnership, both in Italy and internationally, the environmental organisation has supported the Group in developing an organic and systematic approach, contributing to the creation of an open, positive and responsible vision of the future.

The United Nations (UN) Global Compact is one of the most important sustainability initiatives in the world, which the Sofidel Group has joined as a "Participating Member" since 10 years. Membership requires companies to embrace, support and implement, in their strategy and within their sphere of influence, a set of core values identified by the so-called Ten Principles on human rights, labour, environment and anti-corruption standards. Moreover, Sofidel is a "Promoting Founder" member of the Global Compact Network Italy Foundation (GCNI Foundation).

HYGIENE INNOVATION SUSTAINABILITY

The strength of hygiene

Paper towels, helping to reduce the risk of bacterial transmission, are the most effective hygiene tool*. Washing and drying your hands properly is a small daily gesture, but it represents a great contribution to health and therefore to life. For this reason, Papernet, the Sofidel Group brand in the Away-From-Home sector, promotes the culture of hygiene, with the idea that it is the foundation of a higher quality life.

Beyond performance

Papernet creates innovative products which provide true consumer benefits. A wide range of products that stand out on the market not only for its high hygienic effectiveness. The Away-From-Home assortment is sustainable from procurement to production and end use. This is particularly the case with our Tech Lines, Papernet's high value-added products. Besides being made with superior quality paper, thanks to their technology they solve specific problems such as cloggings, sediments in pipes, bad smells etc.

All-round sustainability

The entire Papernet range is based on the principle of economic, social and environmental sustainability. This is the only way, in the long term, that grants the achievement of the goals of all the entities directly and indirectly involved in the company's business activities. Papernet has always operated with responsible business ethics and management, based on learning and continual improvement of its processes. This approach enables Papernet to be a model in its sector.

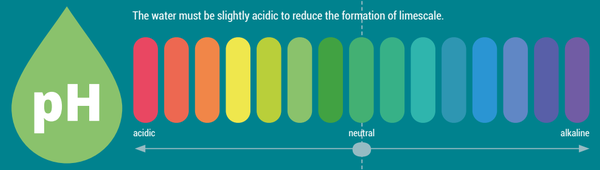
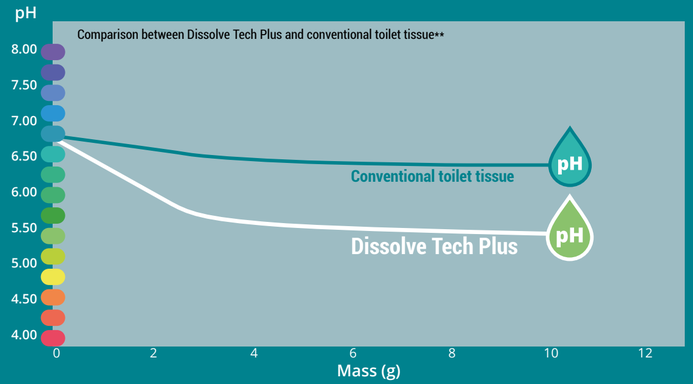
DISSOLVE TECH PLUS: PROVEN RESULT

Laboratory analyses* have shown the **effectiveness** of the **Dissolve Tech Plus** range.



Its special formula **alters the pH of the water**, by lowering it and **helping to combat the formation of limescale**, thus preventing the build-up of deposits.



*Analysis by the Centro Qualità Carta in Lucca
** The analysis was carried out by comparing a 3-ply, pure cellulose, conventional roll, measuring 11.9x9.8 cm, with a 2-ply, pure cellulose Dissolve Tech Plus Mini Jumbo roll, measuring 30.5x9.6 cm.

THE **ACTIVE** TOILET PAPER.

Naturally combacts bacteria while cleaning pipes.

Papernet pays constant attention to improving the quality of life. This is why we created **Bio Tech, an exclusive range of products made with paper capable of fighting naturally pathogenic bacteria** thanks to Biologically Active Tissue Paper Technology (BATP).
The **Bio Tech** range **aids in the cleaning of internal pipework, sewerage and downstream wastewater systems**.

FRESHEN TECH **IS UNIQUE.**

FRESHEN TECH **MEANS SAVING.**

The technology used for the formulation of **Freshen Tech** toilet rolls makes these products **unique**. The anti-odour, allergen-free molecules are sprayed directly into the cardboard core of the roll, meaning the core itself becomes an air freshening system. **As the roll is utilised, the effect remains the same**. A constant sensation of freshness, which is renewed with each refill.

In washrooms with limited ventilation it is difficult to guarantee the sensation of cleanliness and hygiene.
The use of **Freshen Tech toilet paper eliminates the need to use other products such as air freshener aerosols** or automatic dispensing systems.
By using Freshen Tech toilet tissue it is possible to **reduce cost in use** and enhance your washroom experience.

FULL TECH IS UNIQUE.

FULL TECH MEANS SAVING.

Full Tech toilet rolls are produced coreless as a solid roll: a Full Tech toilet paper pack with a small footprint can replace up to **40 rolls** of conventional toilet paper.
The Full Tech dispensing system, with double dispensing, allows to have **300 meters of tissue** in a dispenser of just 16x15x33 cm.
The new **Full Tech Monoroll** dispenser is suitable for both rolls and interleaved dispensing.

The large amount of paper in a small roll means lower costs.
The main benefit derives from the reduction of time to refill: the double Full Tech dispenser can replace up to 20 rolls of conventional toilet paper.
Considering that the replacement of a roll takes about 2 minutes, (including transport times from the warehouse to the washroom), **reloading the rolls of Full Tech toilet paper saves over 30 minutes, therefore reducing cost**.

THE TISSUE **FOR HARD TIMES.**

The perfect combo between strength and absorbency.

Thanks to an innovative production process, **Dry Tech** products offer up to **100% more absorption, capacity and resistance**, compared to traditional paper.
These characteristics ensure end users use less paper which significantly reduces consumption and cost.
Dry Tech products are **the perfect product range for all customers requiring high levels of quality**.

OF OUR PRODUCTS

Ecolabel is the voluntary Type III ecological label recognised on a European level. It is a stylised daisy with the "E" of Europe at its centre, surrounded by stars representing the Member States. It was created by the European Commission in 1992 as a quality label awarded to product and service categories respecting precise ecological criteria. In particular, it indicates that the product guarantees a reduced environmental impact at every phase of its life cycle. For every product, the environmental aspects connected to its production are taken into consideration: the quality of the air, the water and the soil, waste production, resource and energy consumption, noise pollution, protection of the biodiversity. According to the principle of shared environmental management, the new Ecolabel Regulation 2010 establishes that the criteria adopted by the Commission are proposed by an Ecological Label Committee (CUEME) that sees the participation of all interested parties: Industry and SMEs, Consumer Associations, Environmental Associations. And the attention placed on the entire life cycle allows reducing the overall environmental impact, preventing the mere transfer of impacts from one phase to another. Through the Ecolabel, the consumer has access to reliable and scientifically based information on the products' environmental impact. Additionally, Ecolabel products guarantee effective product quality.

Blue Angel products meet a list of criteria considering environmental and health-related aspects. The purchase of a Blue Angel-labelled product is a guarantee of good products with less environmental impact and greater health protection than many other products serving the same purpose. The main criteria for Tissue Paper is that the raw materials is made by 100% recovered paper (Recycled); in fact, Blue Angel suggests that a paper product made from 100% recycled paper saves the entire raw material required for virgin fibre paper production. Such action does not only contribute to a reduction of the volume of waste but also helps to conserve wood resources.

It is the certification system for forests, wood and derived products that ensures that the products come from forests managed pursuant to strict environmental, social and economic standards. The Forest Stewardship Council is the non-profit organization born in Mexico in 1994 and transferred to Bonn in 2003 that issues the certification necessary in order to be able to use the label on the basis of audits performed on the forests where the wood is extracted and in the course of all subsequent production phases, down to the consumer, and that concern environmental and social-ethical aspects. It is a label similar to Type I for the existence of a third certification body. The FSC forest management principles can be summarized in ten points:

Principle #1: Compliance with laws
The Organization shall comply with all applicable laws, regulations and nationally-ratified international treaties, conventions and agreements.

Principle #2: Workers' rights and employment conditions
The Organization shall maintain or enhance the social and economic well-being of workers.

Principle #3: Indigenous peoples' rights
The Organization shall identify and uphold indigenous peoples' legal and customary rights of ownership, use and management of land, territories and resources affected by management activities.

Principle #4: Community relations
The Organization shall contribute to maintaining or enhancing the social and economic well-being of local communities.

Principle #5: Benefits from the forest
The Organization shall efficiently manage the range of multiple products and services of the Management Unit to maintain or enhance long term economic viability and the range of environmental and social benefits.

Principle #6: Environmental values and impact
The Organization shall maintain, conserve and/or restore ecosystem services and environmental values of the Management Unit, and shall avoid, repair or mitigate negative environmental impacts.

Principle #7: Management planning
The Organization shall have a management plan consistent with its policies and objectives and proportionate to scale, intensity and risks of its management activities.
The management plan shall be implemented and kept up to date based on monitoring information in order to promote adaptive management. The associated planning and procedural documentation shall be sufficient to guide staff, inform affected stakeholders and interested stakeholders and to justify management decisions.

Principle #8: Monitoring and assessment
The Organization shall demonstrate that progress towards achieving the management objectives, the impacts of management activities and the condition of the Management Unit, are monitored and evaluated proportionate to the scale, intensity and risk of management activities, in order to implement adaptive management.

Principle #9: High conservation values
The Organization shall maintain and/or enhance the high conservation values in the Management Unit through applying the precautionary approach.
